

## Four Thirds-to-Micro Four Thirds Lens Adapter Compatibility Chart

### Overview

Four Thirds System lenses may be used on Micro Four Thirds-compliant camera bodies by adding either the Olympus MMF-1 or MMF-2 lens adapter.

**Note:** When you take pictures in C-AF mode with the E-PL1 and a Four Thirds System lens, the camera operates in S-AF mode.

### **Notes**

- <sup>1</sup> When it is difficult to focus on your subject using a lens that is not compatible with high-speed imager AF, shooting with "S-AF + MF" mode is recommended.
- <sup>2</sup> Some [lenses that are compatible with high-speed imager AF](#) require a firmware update to achieve compatibility. For this reason, it is recommended to update the firmware in your lens to the latest version.
- Visit the following Web site for more information on how to update lens firmware:  
[Joint update service for OLYMPUS E-SYSTEM.](#)
- <sup>3</sup> Attaching two or more adapters between the camera body and the lens is not recommended.
